

Trend Micro

New computer viruses are created on a daily basis, all harnessing new and innovative ways to spread throughout the Internet, often in a matter of hours. Corporates need not only to protect themselves but also their customers and suppliers. Strong virus protection has been a necessity for years, but it hasn't always been centrally manageable.

New computer viruses are created on a daily basis, all harnessing new and innovative ways to spread throughout the Internet, often in a matter of hours. Corporates need not only to protect themselves but also their customers and suppliers. Strong virus protection has been a necessity for years, but it hasn't always been centrally manageable.

Mobile PCs are considered to be one of the most potentially dangerous devices as they are often located away from the IT administrators. Corporations have to provide secure mechanisms for updating virus pattern files, sometimes when the mobile PC is located overseas.

Trend Micro can provide comprehensive and manageable anti-virus solutions to our valued customers, we are able to provide Trend Micro's products to SMEs and global enterprises.

- Comprehensive, coordinated outbreak protection - from desktop to gateway, and from application layer to network layer, consolidating defences
- Centralised outbreak lifecycle management - simplifies deployment and administration via one central command console for an entire network
- Quick, consistent deployment of security policies network-wide extends IT resources and decreases costs
- Actionable, threat-specific knowledge - prevents or mitigates outbreaks
- Proven approach - award-winning, holistic solution fulfills antivirus security needs

Trend Micro's products are designed to address all major areas and can be divided to two product ranges, SMB (up to 250 users) and Enterprise.

Small and Midium Businesses (SMB up to 250 users)

Product

To Protect
